This formulary was updated on 09/01/2020. For more recent information or other questions, please contact Tufts Medicare Preferred HMO Customer Relations at **1-800-701-9000** or, for TTY users, 711, 8:00 a.m. to 8:00 p.m., 7 days a week from October 1 to March 31 and Monday–Friday from April 1 to September 30, or visit **www.thpmp.org**.

Tufts Medicare Preferred HMO Group Retiree 2021 Formulary (List of Covered Drugs)

Note to existing members: This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

When this drug list (formulary) refers to “we,” “us,” or “our,” it means Tufts Health Plan Medicare Preferred. When it refers to “plan” or “our plan,” it means Tufts Medicare Preferred HMO.

This document includes a list of the drugs (formulary) for our plan which is current as of September 2020. For an updated formulary, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You must generally use network pharmacies to use your prescription drug benefit. Benefits, formulary, pharmacy network, and/or copayments/coinsurance may change on January 1, 2022, and from time to time during the year.

What is the Tufts Medicare Preferred HMO Formulary?

A formulary is a list of covered drugs selected by Tufts Medicare Preferred HMO in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Tufts Medicare Preferred HMO will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a Tufts Medicare Preferred HMO network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your *Evidence of Coverage*.

Can the Formulary (drug list) change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the Drug List during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow Medicare rules in making these changes.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **New generic drugs.** We may immediately remove a brand name drug on our Drug List if we are replacing it with a new generic drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. Also, when adding the new generic drug, we may decide to keep the brand name drug on our Drug List, but immediately move it to a different cost-sharing tier or add new restrictions. If you are currently taking that brand name drug, we may not tell you in advance before we make that change, but we will later provide you with information about the specific change(s) we have made.
- If we make such a change, you or your prescriber can ask us to make an exception and continue to

cover the brand name drug for you. The notice we provide you will also include information on how to request an exception, and you can also find information in the section entitled “*How do I request an exception to the Tufts Medicare Preferred HMO Formulary?*” on page 5.

- **Drugs removed from the market.** If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug’s manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.

Other changes. We may make other changes that affect members currently taking a drug. For instance, we may add a generic drug that is not new to market to replace a brand name drug currently on the formulary; or add new restrictions to the brand name drug or move it to a different cost-sharing tier or both. Or we may make changes based on new clinical guidelines. If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug, or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 30-day supply of the drug.

- If we make these other changes, you or your prescriber can ask us to make an exception and continue to cover the brand name drug for you. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled “*How do I request an exception to the Tufts Medicare Preferred HMO Formulary?*” on page 5.

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2021 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2021 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the Drug List for the new benefit year for any changes to drugs.

The enclosed formulary is current as of September 2020. To get updated information about the drugs covered by Tufts Medicare Preferred HMO, please contact us. Our contact information appears on the front and back cover pages. In the event of a mid-year non-maintenance formulary change, you will be notified via an errata sheet.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 14. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category “*Cardiovascular Agents.*” If you know what your drug is used for, This formulary was updated on 09/01/2020

look for the category name in the list that begins on page 12. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 94. The Index provides an alphabetical list of all of the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

Tufts Medicare Preferred HMO covers both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** Tufts Medicare Preferred HMO requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from Tufts Medicare Preferred HMO before you fill your prescriptions. If you don't get approval, Tufts Medicare Preferred HMO may not cover the drug.
- **Quantity Limits:** For certain drugs, Tufts Medicare Preferred HMO limits the amount of the drug that Tufts Medicare Preferred HMO will cover. For example, Tufts Medicare Preferred HMO provides 30 tablets per prescription for *ramelton*. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy:** In some cases, Tufts Medicare Preferred HMO requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, Tufts Medicare Preferred HMO may not cover Drug B unless you try Drug A first. If Drug A does not work for you, Tufts Medicare Preferred HMO will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 14. You can also get more information about the restrictions applied to specific covered drugs by visiting our web site. We have posted online a document that explains our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask Tufts Medicare Preferred HMO to make an exception to these restrictions or limits, or for

a list of other, similar drugs that may treat your health condition. See the section “*How do I request an exception to the Tufts Medicare Preferred HMO Formulary?*” on page 5 for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Customer Relations and ask if your drug is covered.

If you learn that Tufts Medicare Preferred HMO does not cover your drug, you have two options:

- You can ask Customer Relations for a list of similar drugs that are covered by Tufts Medicare Preferred HMO. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by Tufts Medicare Preferred HMO.
- You can ask Tufts Medicare Preferred HMO to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the Tufts Medicare Preferred HMO Formulary?

You can ask Tufts Medicare Preferred HMO to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to cover a formulary drug at a lower cost-sharing level if this drug is not on the specialty tier. If approved this would lower the amount you must pay for your drug.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, Tufts Medicare Preferred HMO limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.

Generally, Tufts Medicare Preferred HMO will only approve your request for an exception if the alternative drugs included on the plan’s formulary, the lower cost-sharing drug, or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary or utilization restriction exception. **When you request a formulary or utilization restriction exception you should submit a statement from your prescriber or physician supporting your request.** Generally, we must make our decision within 72 hours of getting your prescriber’s supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to

72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get a supporting statement from your doctor or other prescriber.

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your doctor to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 30-day supply of medication. After your first one-month supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

As a current member, if you are admitted to or discharged from a long-term facility and experience an unplanned drug change, you can request that we approve a one-time, temporary fill of the non-covered medication to allow you time to discuss a transition plan with your physician. Your physician can also request an exception to coverage for the non-covered drug based on review for medical necessity following the standard exception process outlined previously. The temporary "first fill" will generally be up to a 31-day supply, but may be extended to allow you and your physician time to manage the complexities of multiple medications or when special circumstances warrant. You can request a temporary prescription fill by calling the Tufts Medicare Preferred HMO Customer Relations department.

Tufts Medicare Preferred HMO Formulary

The formulary that begins on page 14 provides coverage information about the drugs covered by Tufts Medicare Preferred HMO. If you have trouble finding your drug in the list, turn to the Index that begins on page 94.

The first column of the chart lists the drug name. Brand name drugs are capitalized (e.g., ENTRESTO) and generic drugs are listed in lower-case italics (e.g., *omeprazole*).

The information in the Requirements/Limits column tells you if Tufts Medicare Preferred HMO has any special requirements for coverage of your drug.

B vs D: Medicare Part B or D

These drugs require prior authorization to determine appropriate coverage under Medicare Part B or Part D.

QL: Quantity Limit Applies

Because of potential safety and utilization concerns, Tufts Medicare Preferred HMO has placed dispensing limitations on a small number of prescription drugs. This means that the pharmacy will only dispense a certain quantity of a drug within a given time period. These quantities are based on recognized standards of care, such as U.S. Food and Drug Administration recommendations for use. If your doctor believes you need a quantity greater than the program limitation, your doctor can submit a request for coverage under the Medical Review Process. The Medical Review Process allows you or your doctor to ask Tufts Medicare Preferred HMO to make an exception to our coverage rules. See the section, “*How do I request an exception to the Tufts Medicare Preferred HMO Formulary?*” on page 5 for information about how to request an exception.

EC: Enhanced Coverage Drug

This prescription drug is not normally covered in a Medicare Prescription Drug Plan. The amount you pay when you fill a prescription for this drug does not count towards your total drug costs (that is, the amount you pay does not help you qualify for catastrophic coverage). In addition, if you are receiving extra help to pay for your prescriptions, you will not get any extra help to pay for this drug.

HI: Home Infusion Drug

This prescription drug may be covered under your medical benefit. For more information, please contact us at **1-800-701-9000** or, for TTY users, 711. Representatives are available 8:00 a.m. to 8:00 p.m., 7 days a week from October 1 to March 31 and Monday - Friday from April 1 to September 30.

LA: Limited Access Drug.

This prescription may be available only at certain pharmacies. For more information consult your Pharmacy Directory or contact us at **1-800-701-9000** or, for TTY users, 711. Representatives are available 8:00 a.m. to 8:00 p.m., 7 days a week from October 1 to March 31 and Monday - Friday from April 1 to September 30.

PA: Prior Authorization Required

The Prior Authorization process encourages rational prescribing of drug products with significant safety and/or financial concerns. A provider can submit a request for coverage based on a member's medical need for a particular drug. If approved, the member pays the designated tier copayment. An appeal process exists for denied requests.

STPA: Step Therapy Prior Authorization Applies

Step Therapy is an automated form of Prior Authorization, which uses claims history for approval of a drug at the point of sale. Step Therapy Programs help encourage the clinically proven use of first-line therapies and are designed to ensure the utilization of the most therapeutically appropriate and cost-effective agents first, before other treatments may be covered.

Members who are currently on drugs that meet the initial Step Therapy criteria will automatically be able to fill their prescriptions for a stepped medication. If the member does not meet the initial Step Therapy criteria, the prescription will deny at the point of sale with a message indicating that Prior Authorization (PA) is required. Physicians may submit Prior Authorization requests to Tufts Medicare Preferred HMO for members who do not meet the Step Therapy criteria at the point of sale under the Medical Review process. The Medical Review Process allows you or your doctor to ask Tufts Medicare Preferred HMO to make an exception to our coverage rules. See the section, *"How do I request an exception to the Tufts Medicare Preferred HMO Formulary?"* on page 5 for information about how to request an exception.

Transplant:

This drug is covered under Part B when used for a Medicare covered organ transplant.

Part B Drug:

No copayment is required and the cost of the medication does not apply to your Part D benefit.

NEDS: Non-extended Day Supply Drug

In an effort to contain drug costs, certain high-cost drugs will be limited up to a 30-day supply per fill.

SP: Available Through a Designated Special Pharmacy Provider

You have the option to obtain this drug through a designated Specialty Pharmacy provider. These pharmacies specialize in supplying a select number of medications directly to our members. They also provide free delivery to your home, educational support 24/7 by phone, support of nurses and pharmacists, and will work closely with your doctor. Medications include, but are not limited to, drugs used in the treatment of multiple sclerosis, hepatitis C, rheumatoid arthritis, and cancers treated with oral medications.
